

How to change Internet Explorer settings for Fastenal Punchout

Step 1

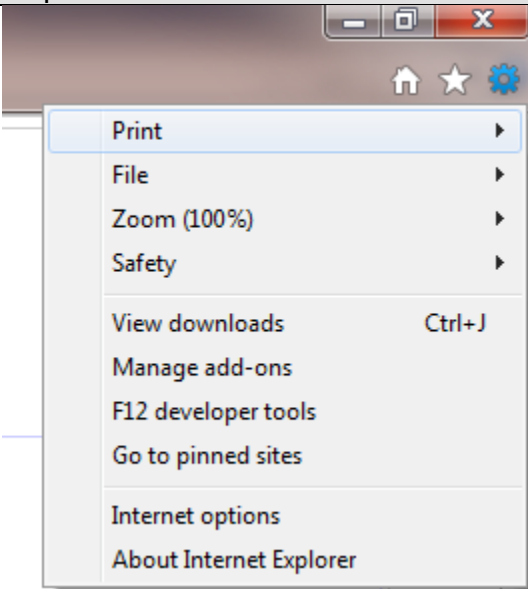

Open Internet Explorer.

If your Menu bar is visible, click Tools, scroll to the bottom of the menu and click Internet Options.

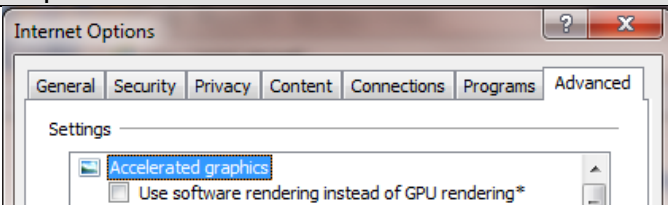

Step 2

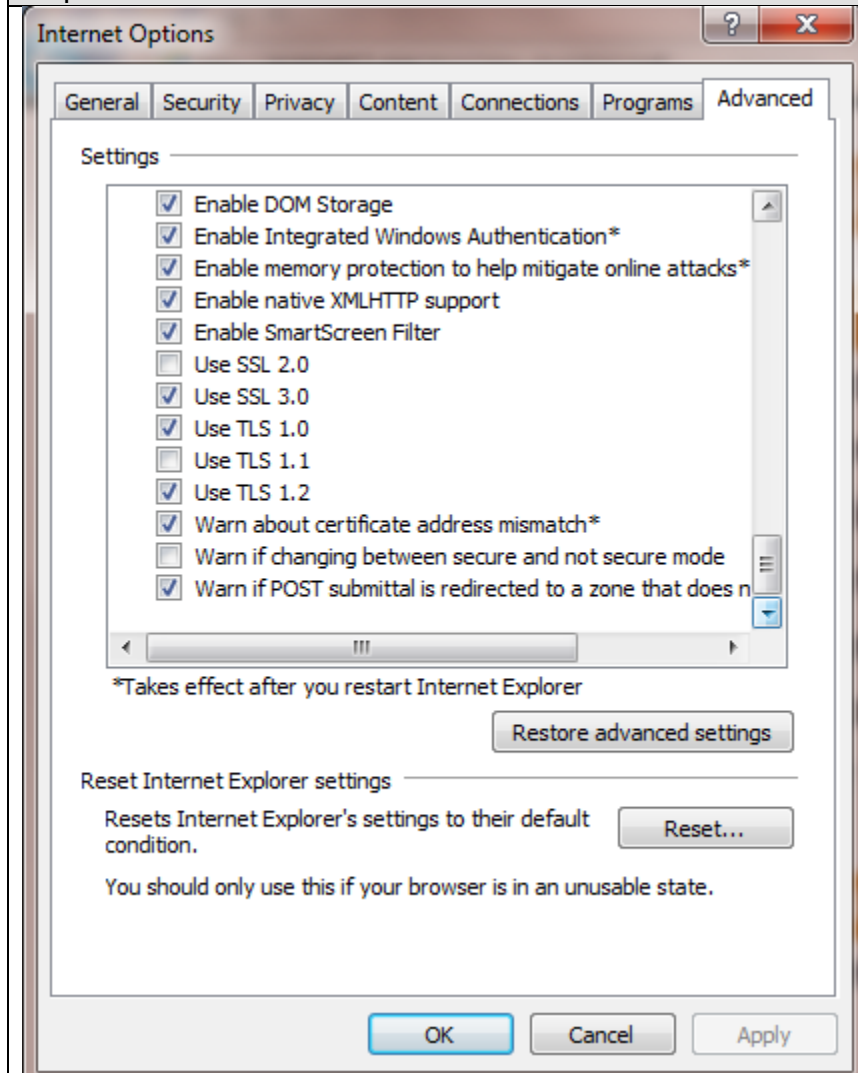

If your Menu bar is not visible, click the Tools icon on the far right side of your screen (it looks like a cog wheel), and click Internet Options.

Step 3

Click the Advanced tab on the right side of the dialog box.

Step 4

Scroll to the bottom of the list and make sure that "Use TLS 1.2" is checked.

Note: You can leave the other boxes as they are.

Click OK.
